Professional Summary

AI software engineering student and independent developer building desktop AI assistants, automation systems, web applications, and creative production tools. Experience coordinating complex projects, iterating on software with AI-assisted development workflows, and managing independent businesses. Seeking remote junior software, AI application, or automation development opportunities.

Technical Skills

Languages: Python, JavaScript, HTML, CSS
AI & Automation: Ollama, local language models, AI-assisted development, multi-agent workflow design
Applications & Tools: Tkinter, Git, GitHub, Cloudflare Workers, Render, FFmpeg, Blender
Practices: Debugging, incremental development, backups, testing, documentation, UI design

Selected Development Projects

PsychBot V2 — Desktop AI Assistant

- Developed a Python/Tkinter conversational assistant with session management, configurable voice controls, and Ollama integration.
- Implemented guided meditation functionality with ambient soundscapes, playback controls, and narration-aware audio processing.
- Added streaming response handling and sentence-level speech queuing; performed component-level verification.

Joker Command Center — Local AI Orchestration

- Developed a local multi-worker AI controller with task routing, execution safeguards, recovery handling, and verification workflows.

Code Auditor — Defensive Code Analysis Web App

- Built a browser-based code auditing project focused on identifying code issues and security-related patterns.
- Live project: clean-code-t6w2.onrender.com

Hollowmouth Studios — 3D Production Pipeline

- Developing a Blender-based character modeling, rigging, and animation workflow with versioned checkpoints and preview renders.

Suno Producer — AI-Assisted Music Production Tool

- Developed a web-based creative workflow for AI-assisted song ideas, lyric generation, and fine-tuning.

Professional Experience

Independent Business Owner / Operator

Operated a moving business (2012–2015) and developed independent handmade-product ventures involving production, customer service, and business operations.

Pete Balonas Roofing — Roofing & Construction

2008–2022, intermittent · Hands-on construction, project execution, and job-site coordination.

Ken-Do Contracting — Roofing & Construction

2003–2008 · Construction and roofing work.

Education

Maestro AI University
AI Software Engineering coursework.
